

Thank You – From the Myocarditis Foundation

Saturday, June 8, 2019 was a beautiful day to memorialize Lillie Nicole Hall, who at the very young age of three passed away from Myocarditis. Lillie's parents, Lindsay and Willie Hall, and her grandmother, Teri Elie, hosted the event at the Gauntlet Golf Club to help raise awareness for Myocarditis and funds for education and research of the disease.

There were over 80 people in attendance to golf and participate in the day's events. Myocarditis Foundation Board Member, Giustina Schiano, spoke about the Foundation and what it is doing to support research and education for both the medical, as well as public communities.

The Myocarditis Foundation would like to offer a big thank you to the Hall and Elie families for all that you did to raise awareness about the disease in memory of Lillie, so that others do not suffer the pain and anguish that their family has had to endure.
